PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience building production-grade mobile and web applications using **React.js, React Native, Spring Boot, and MongoDB**. Delivered **2 end-to-end projects** — a full-featured E-Commerce platform with **10+ modules** and a ride-sharing app with real-time mapping. Actively deepening expertise in Microservices, Redis caching, Docker containerization, and AWS cloud infrastructure (EC2, S3, IAM) to architect scalable, cloud-ready backend systems.

TECHNICAL SKILLS & TOOLS

- **Programming Languages:** Java, JavaScript (ES6+)
- **Backend:** Spring Boot, Maven, REST API Design, Kafka, JWT Authentication, Microservices
- **Frontend:** React.js, React-Native, HTML5, CSS3
- **Database:** MySQL
- **Version Control:** Git, GitHub
- **DevOps & Tools:** Docker, AWS (EC2, S3), Git, GitHub, Postman, Visual Studio Code
- **Architecture:** RESTful API Design, Caching (Redis), API Rate Limiting, Scalable System Design

PROJECTS

E-Commerce | React Native · Spring Boot · MongoDB · Twilio

- Developed a React Native mobile application for **E-Commerce**, employing **React-Native, Spring Boot, JavaScript**, and **MongoDB Database**, demonstrating strong technical skills and proficiency in **Back-end and Front-end** React-native mobile application development.
- Developed a full-featured e-commerce system with user authentication (sign-up, login, OTP-based password recovery using **Twilio**), dynamic **Wishlist** and cart functionality, order placement with tax and delivery calculations, and a **User Profile** with editable details and **order history**.
- **Packages Used:** including Twilio, React-Navigation, Stack-Navigation, Axios, Async-Storage, Image-Slider, React-Native-Animatable, React-Native-Share, Responsive-Dimensions etc.

Uber Clone | React Native · Redux · Spring Boot · Google Maps API

- **Fare Estimation:** Implemented fare estimation calculations based on distance, time, and vehicle type using the Google Distance API and Integrated a **Map View** that displays maps and directions using the React-Native-Maps package.
- **State Management with Redux:** Utilized Redux to manage and store the origin and destination points for travel efficiently and **responsive front-end development**.
- **Packages Used:** Redux, Elements, Google-Places-Autocomplete, Maps, Maps-Directions, Google-Matrix etc.

PROFESSIONAL EXPERIENCE

Analyst, RGFTE Production

Genpact Limited

Sep 2024 - Present

Jodhpur, INDIA

- Developed backend microservices for user management and business workflows using **Java 17, Spring Boot, Hibernate, and MySQL**.
- Designed and integrated backend solutions including **Kafka-based event-driven communication and Redis caching** improving application performance and system reliability.
- Built and deployed containerized applications using **Docker and AWS**, while contributing to production support, debugging, and feature enhancements.
- Implemented JWT token-based authentication to secure endpoints across distributed microservices.

Software Developer - Internship

Feb 2023 - July 2023

CodePlanet Technologies

Jaipur, INDIA

- Successfully executed project development tasks using cutting-edge technologies prevalent in the corporate world, including React.js, MongoDB, JavaScript, Spring Boot.
- Applied extensive expertise in these technologies during project execution to ensure smooth implementation and timely delivery of project solutions, showcasing comprehensive knowledge and skills.
- Made data fetching fast using indexing in database.
- Proficiently utilized tools, including **Git**, to **enhance productivity** and **streamline development processes**

EDUCATION

- **Master of Computer Applications (MCA) — Software Development** 2024 - 2026
Manipal University Jaipur

CERTIFICATIONS

- Earned Java Full Stack Developer certificate from **Genpact**.
- Earned the "Oracle Learning Explorer" badge in Java from **Oracle**.
- Successfully completed a 68.5 hours "**JavaScript**" course offered by **Udemy**.
- Earned **Full Stack** Developer certificates from CodePlanet, validating expertise in development.
